Overview

- Introduction to the IMAT instrument
- IMAT's Camera Positioning System
- Why use a robot?
- System performance
- Are robots dangerous?

The ISIS Facility

- Oxfordshire, UK
- 1985 Facility Opened
- 2008 TS2 opened
- Pulsed Spallation Source
- Target Stations
 - TS1 160kW 40Hz
 - TS2 40kW 10Hz

Science & Technology Facilities Council

ISIS

The ISIS Facility

- 30 Operational Beamlines
- 350 staff members
 - 24 Instrument Design Engineers

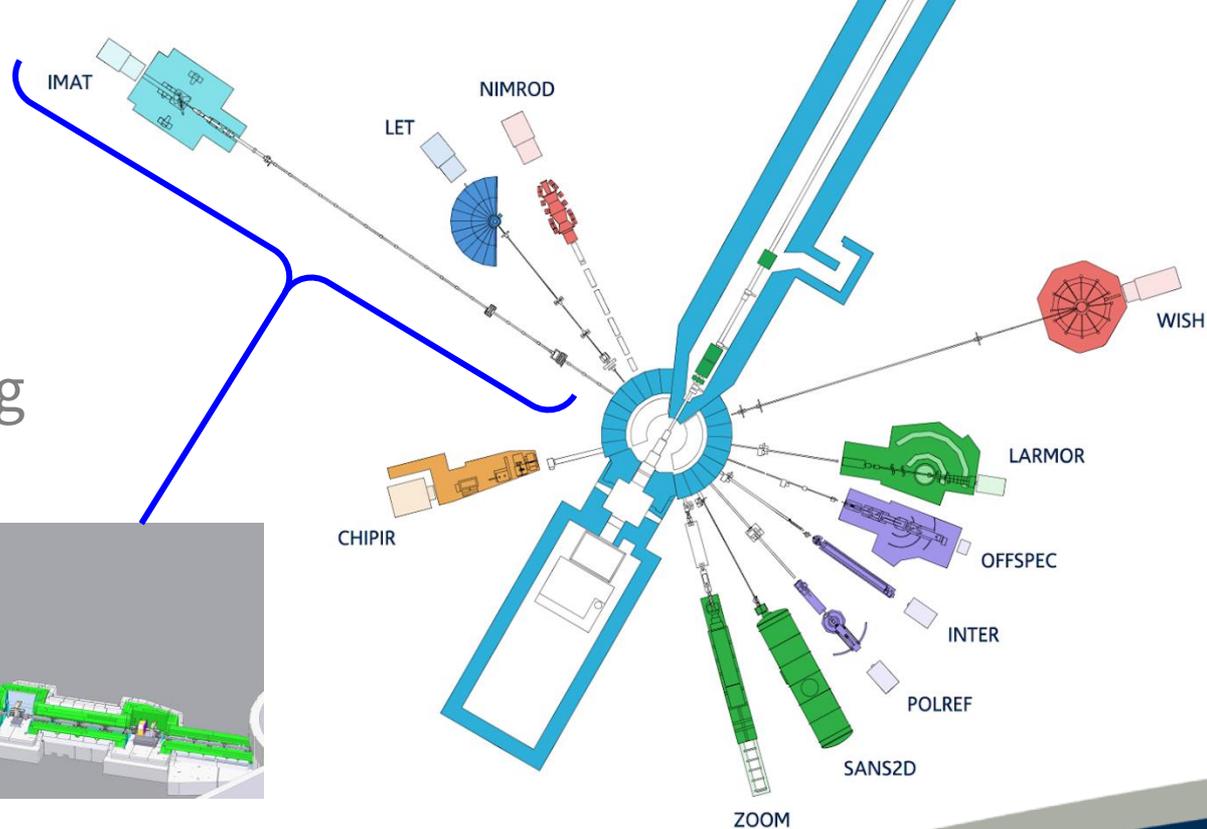

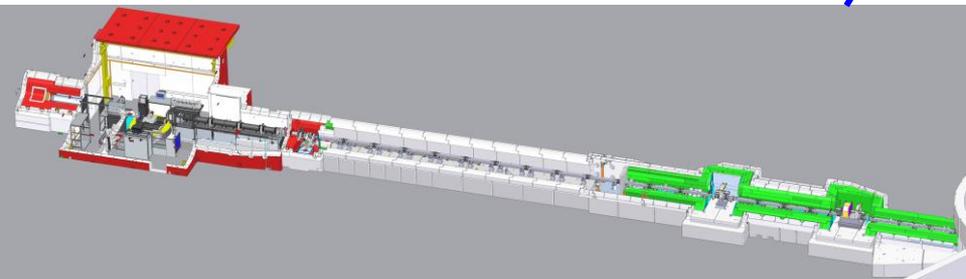

Types of Instrument at ISIS

- Diffractometer
- Reflectometer
- Small Angle Scattering
- Indirect Spectrometer
- Direct Spectrometer
- Muon Spectrometer/Instrument
- Chip Irradiation
- Imaging and Diffraction

Tender Specification

- Move camera out of data-collection position
- Move to parking location on storage shelf
- Release camera
- Move to next camera parking location
- Pick up next camera
- Move to data-collection position

System

ABB iRB6620

Schunk SWS-210-L

GÜDEL TMF-3

2.2 + 0.8m reach

3.5m tall

Max 150 kg load

Operation

The image displays three sequential screenshots of the ABB IMAT Camera Positioning System software interface, all running on a Windows operating system with the ABB logo and version information (Manual 6620-100902 (10.1.8.4) Guard Stop Stopped (2 of 2)) visible at the top.

- First Screenshot:** The window title is "IMAT Camera Positioning System". It features a login dialog box with fields for "User:" and "Password:" (containing "Password"), and "OK" and "Cancel" buttons.
- Second Screenshot:** The window title is "IMAT Camera Positioning System". It shows a "Camera Selection" button, a "Camera Position" button with a green circular arrow icon, a "Teaching" button with a robot icon, and a "I/O" button with left and right arrow icons. The status bar indicates "Logged as: User".
- Third Screenshot:** The window title is "IMAT Camera Positioning System / Camera Selection". It shows "Actual Camera: 0 Messina CCD". Under "Mount Camera", there are buttons for "Camera 1 Messina CCD", "Camera 2 Berkeley MCP", "Camera 3", and "Camera 4". An "Unmount Camera" section contains an "Unmount" button. The status bar shows "G-Rob" and a "Close" button.

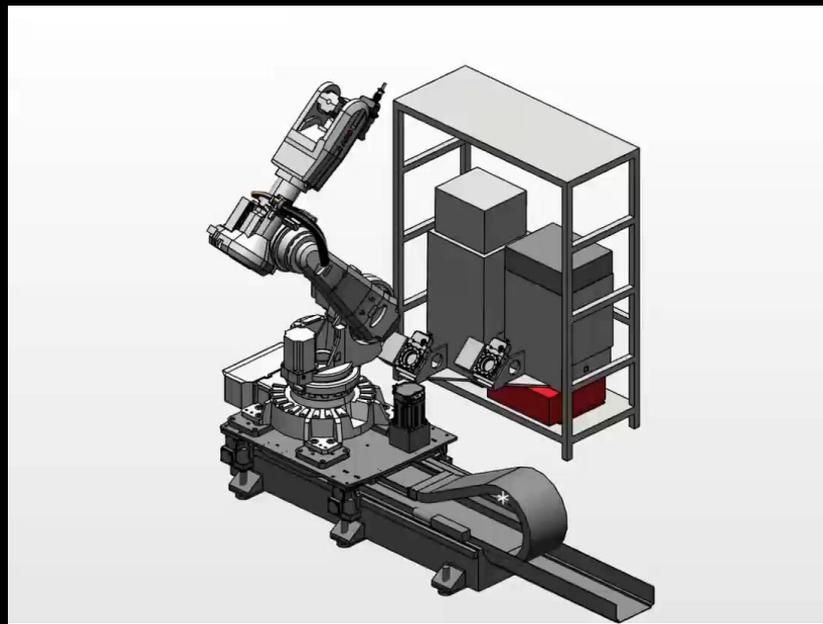

The third screenshot also includes a "Camera Position" window with the title "IMAT Camera Positioning System / Camera Position" and the NatX-ray logo. It displays "Actual Camera: 3" and a table for camera parameters:

	Translation	Rotation
X	100 mm	891.873
Y	47 mm	-94.5453
Z	59 mm	0.0106...

Additional controls include a "Position" dropdown menu, "Save Position", "Retrieve Position", and "Data collection origin" buttons. The status bar shows "G-Rob" and "ROB_1".

Performance

Requirement		Performance
Positioning repeatability of the mechanical system	< 0.08 mm	31.49 μ m
Accuracy (Pose)	< 0.6 mm	65 μ m
Holding Stability	< 0.04 mm	14.47 μ m
Travel in X direction (in-line with the neutron beam)	700 mm	1400 mm
Travel in Y direction (perpendicular to the beam)	450 mm	450 mm
Travel in Z direction (height)	450 mm	450 mm
Camera exchange time	< 90 s	2 min 45 sec

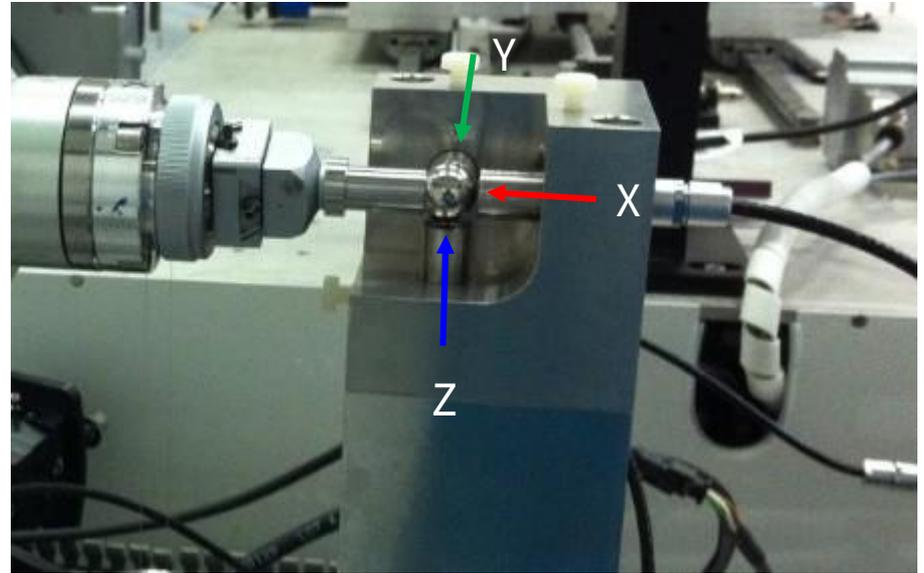

Position Testing

3x capacitive displacement sensor

Micro-Epsilon CS1 & DT6100

Measuring range: 1 mm

Resolution: 1 μm

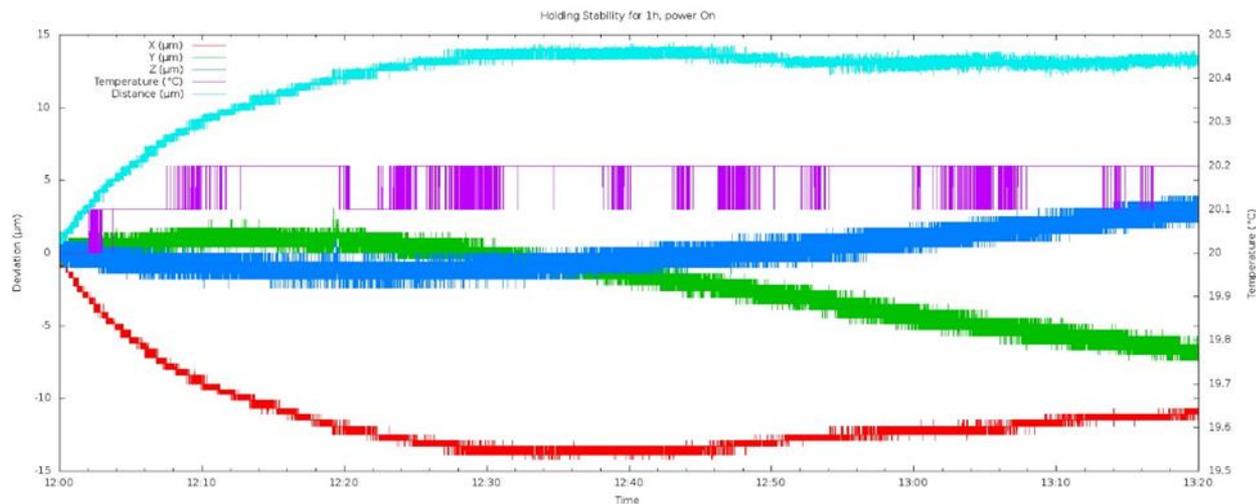

Science & Technology Facilities Council

ISIS

Stability

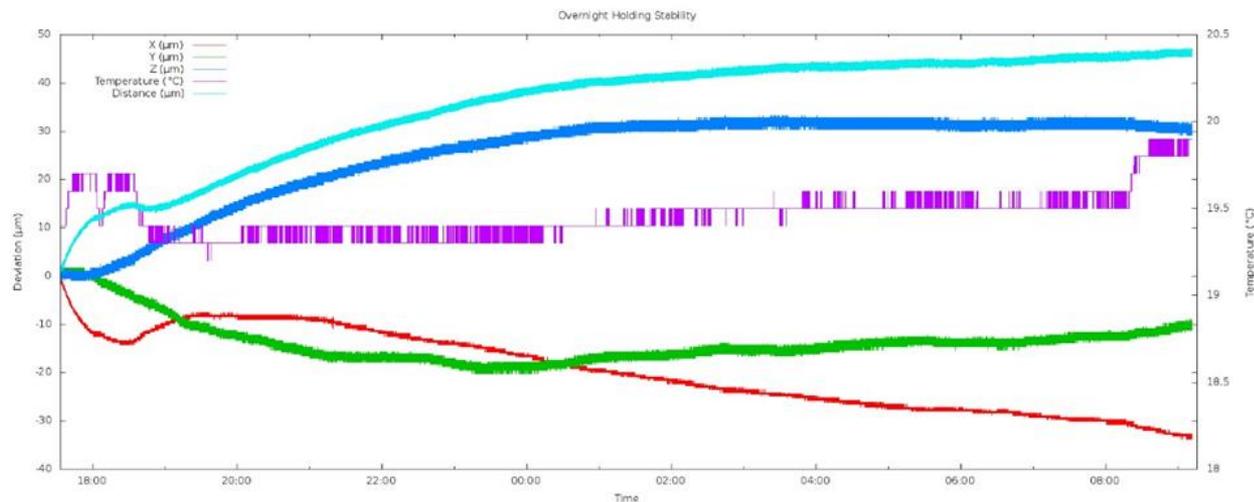

maximum deviation of the position is **14.47 μm** over **1h**

X (μm) —
Y (μm) —
Z (μm) —
Distance (μm) —
Temperature ($^{\circ}\text{C}$) —

Stability

maximum deviation of the position is **45 μm** over **16h**

X (μm) - red
Y (μm) - green
Z (μm) - blue
Distance (μm) - cyan
Temperature ($^{\circ}\text{C}$) - purple

Making robots safer

~~Are robots dangerous?~~

Science & Technology Facilities Council

ISIS

Standards

- Design process
- Assessment of risks
- Best practice

eg. BS EN ISO 12100,
 BS EN ISO 13849,
 BS EN ISO 10218-2...

Science & Technology Facilities Council

ISIS

Safety Measures

Emergency stop

Enabling device
("deadman's handle")

Competent
trained operator

+ controlled access

Science & Technology Facilities Council

ISIS

Operators

- General operators → instrument scientists
- Expert operators → motion engineers
- Maintenance operators → support technicians

Caution
Machinery may start
without warning.
Obey robot operator
at all times.

Review

- Introduction to the IMAT instrument
- IMAT's Camera Positioning System
- Why use a robot?
- System performance
- Some safety considerations
