ODIN (BEER, Heimdal)

TUM
ANTARES, Nectar

ISIS, **TU**Delft, ILL, Saclay, BNC, HZG, NPI...

ESS interest:

- **standardized user interface for European Imaging user community**
- profit from development and tools available in community
- development and implementation of ESS specific tools

requirements:

- **agree with leading community on**
 - + **priority needs of community**
 - + **formats**
 - + **required tools**
 - + **interfacing with commercial software**
 - + **platform structure**
 - + **user interfaces**
- **develop platform stepwise & led by community**
- **install a corresponding**
advisory committee representing leading facilities (PSI, TUM, HZB, ESS, + ISIS)

ESS interest:

- standardized user interface for European Imaging user community
- **profit from development and tools available in community**
- development and implementation of ESS specific tools

requirements:

- **ensure activities and developments in the community**
 - + **) are coordinated with platform**
 - + **) can be accommodated by platform**
- and
 - + **) do not duplicate ongoing or completed work**
 - + **) enable implementing and/or simple interfacing with external tools (including commercial and facility specific available solutions)**
- **start with conventional and state-of-the-art methods**
- **base corresponding decisions on**
advisory committee representing leading facilities (PSI, TUM, HZB, ESS,
+ ISIS)

ESS specific requirements

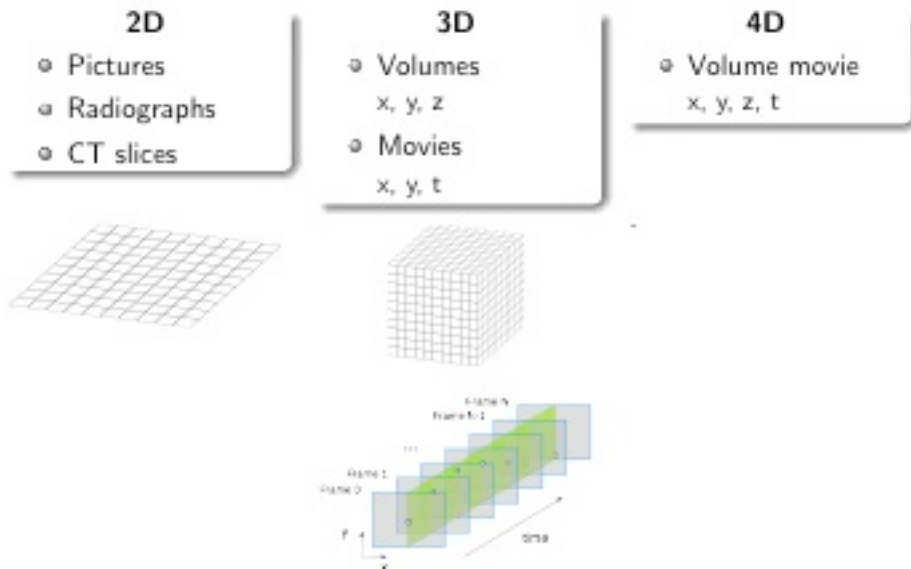

ESS interest:

- standardized user interface for European Imaging user community
- profit from development and tools available in community
- **development and implementation of ESS specific tools**

↑
& ISIS

requirements:

Conventional and state-of-the-art +

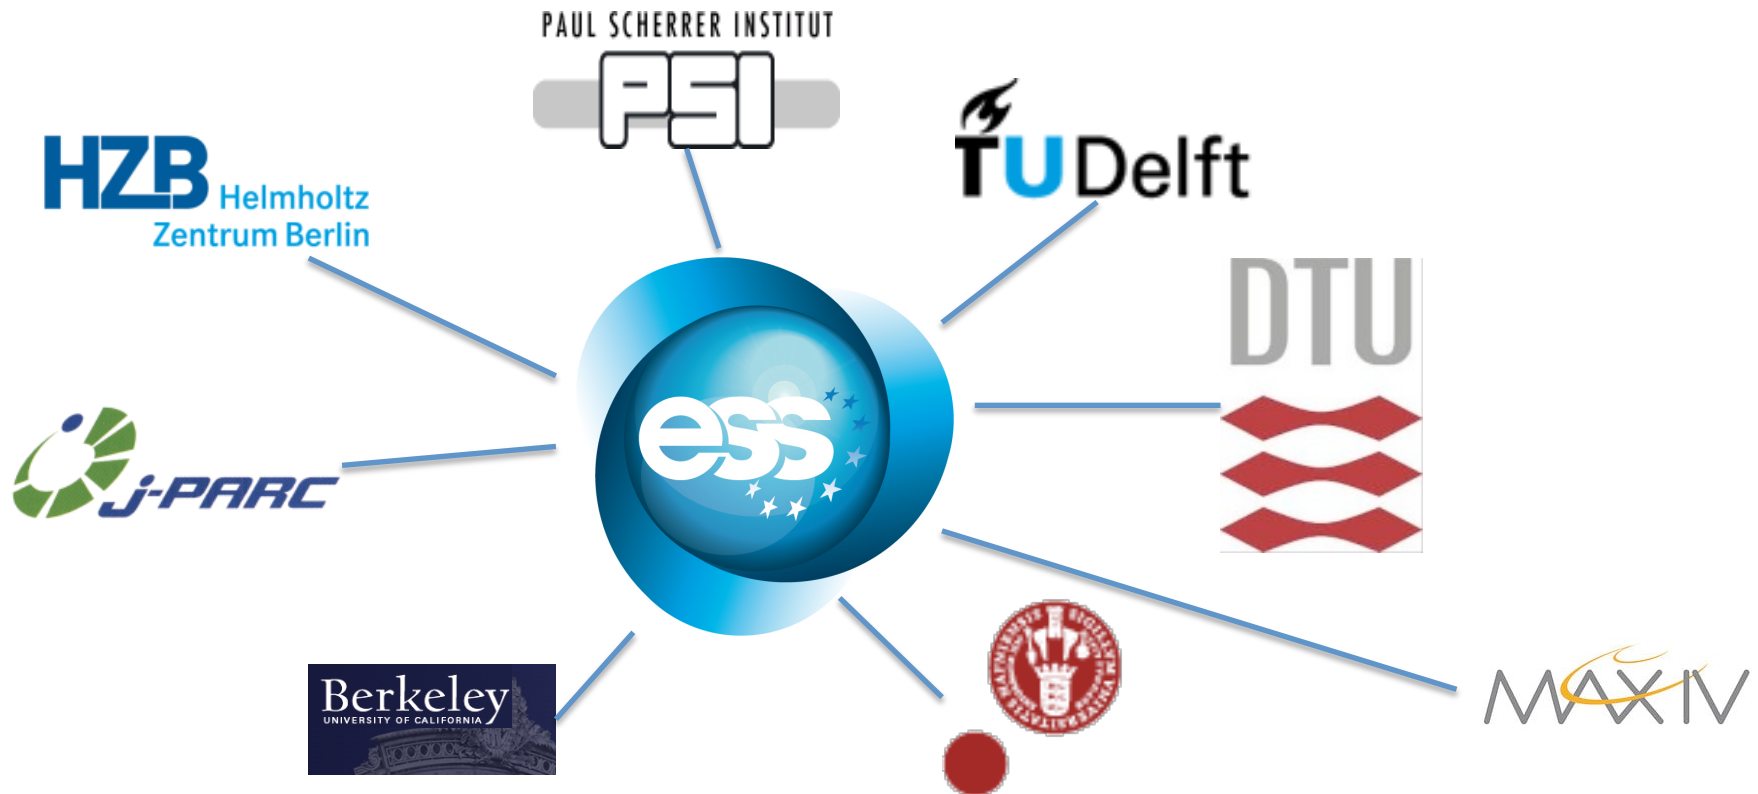

Development with scientific partners

ODIN development network

ESS interest:

- standardized user interface for European Imaging user community
- profit from development and tools available in community
- **development and implementation of ESS specific tools**

ESS interest:

- standardized user interface for European Imaging user community
- profit from development and tools available in community
- **development and implementation of ESS specific tools**

requirements:

- **implementation of novel modalities**
- **cross fertilize SANS and diffraction analyses tools**
- **aid step from development results to user-tool**
- **timeline: after standard methods, prepare first implementations in second half of SINE2020**
- **closely coordinate with ESS imaging developments**
- **base prioritization on ESS imaging instrument requirements**
-

Thank you!
