Control systems for ART

Tuesday, 6 September 2022 08:30 (1 hour)

I will introduce our product TreatmentOne. which was developed with the future in mind, specially to support the evolution towards adaptive methodologies. It is in fact a three-in-one solution: A Record and Verify (R&V), a treatment session manager, and a treatment control system that synchronizes the operation of all devices and subsystems and enables users to perform clinical and QA workflows. It was designed and developed according to strict medical standards and the latest best practices for usability. It provides streamlined workflows and the features needed to address the challenges of operating and integrating modern radiotherapy devices. TreatmentOne is modular and configurable, making integration easy and a perfect fit for customer-specific radiation therapy devices.

I will walk you through a treatment workflow and explain the features and configurations.
