

HPC without the Internet - an Air Gapped Environment for Sensitive Data

Thursday, 4 May 2023 11:15 (30 minutes)

The University of Lausanne has significant research interests involving biomedical and other types of sensitive data which need to be adequately protected. We describe the new university cluster for treating such data and explain how we try to make it as usable as possible for researchers and administrators.

Presenter: ROCHE, Ewan (University of Lausanne)
