

Guided Tour - Nano Imaging Lab

Thursday, 4 May 2023 13:55 (40 minutes)

The Nano Imaging Lab (NI Lab) has various scanning electron microscopes (SEM), transmission electron microscopes (TEM), and atomic force microscopes (AFM). It is also equipped with focused ion beam technology and confocal microscopes and can perform various spectroscopic analyses. More details can be found on this page: <https://nanoscience.unibas.ch/en/services/nano-imaging-lab/>
