

EIDO (7901) Update

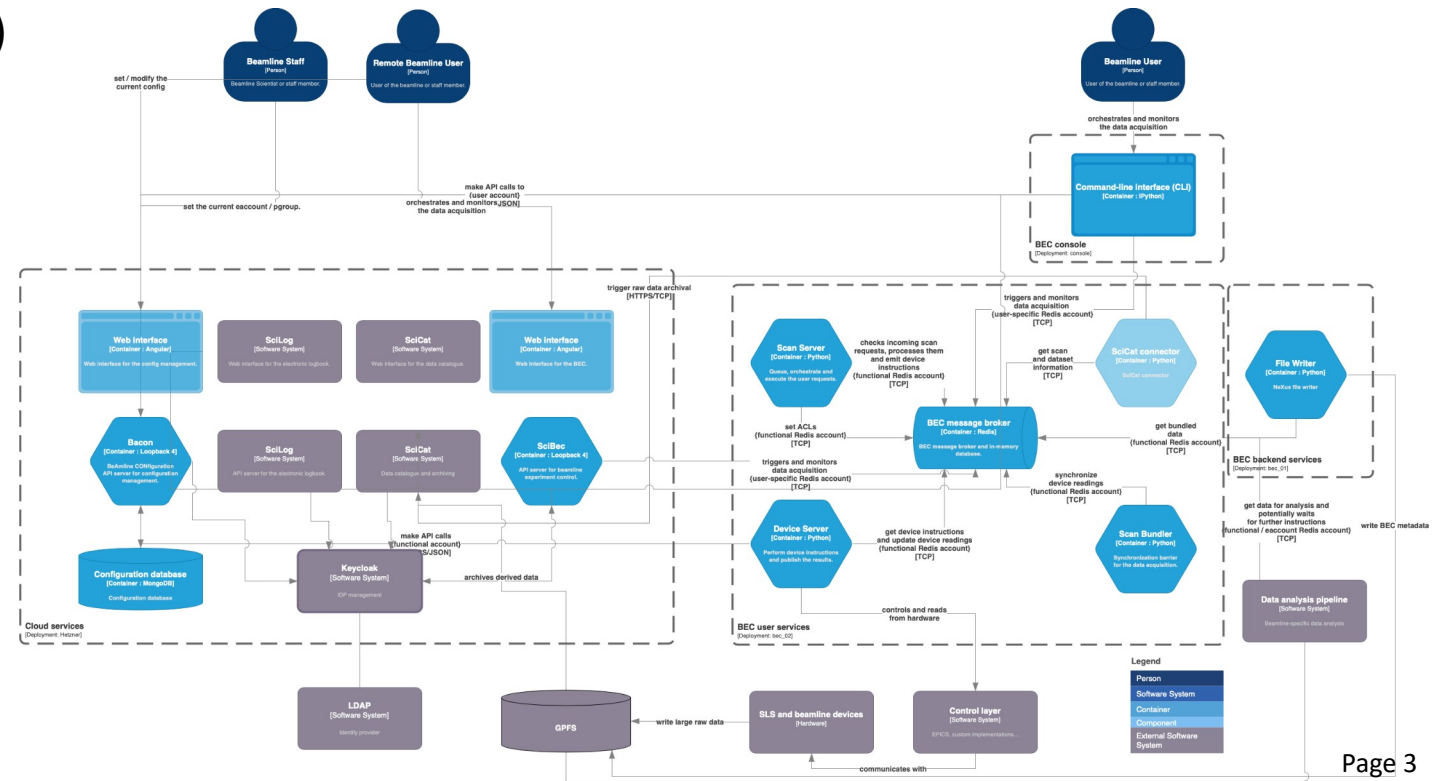

March 6, 2023

- Big transition from version 7 to 8 ongoing

- Preparation for user tests at SLS (X-Treme and cSAXS)
- Work on a web-based configuration and access management system
- Preparation for the envisioned deployment
- SciHub connector (SciLog, SciCat, BEC)

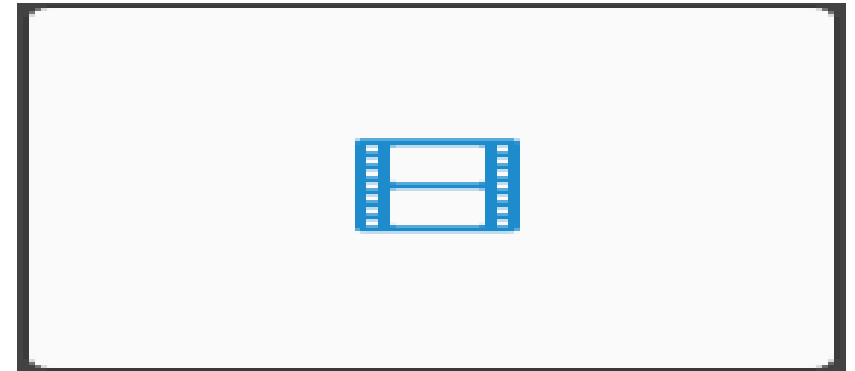

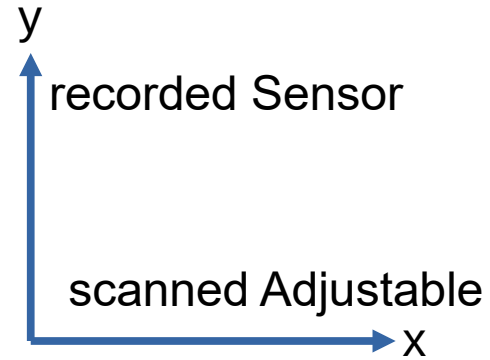

slic:

- New interface: Sensors
- GUI:
 - Improved feedback on math entries
 - Display pgroup meta info: owner(s), title, type
 - DBUS notifications
- CLI:
 - Address Adjustables by name (vs. by variable)
 - Device filtering (by type / by name)
- And various improvements under the hood...

sfdata:

- Meta data handling (slightly smart: lazy loading with caching)
