

PSI IT – 3rd IT Quarterly Info 08/2023

Time	Topic	Responsible
09.00 – 09.10	Welcome & General Update	Ronny Peterhans
09.10 – 09.35	Information / Update AIT	Ronny Peterhans
09.35 – 10.05	5 Years with SCRUM – an Experience Report	Rico Besson
10.05 – 10.40	Break (with coffee and croissants)	Tanja Wagner
10.40 – 11.00	PM@PSI & ePPM Platform	Alexander Koschik, Dario Veghini
11.00 – 11.15	Information / Update AWI	Alun Ashton
11.15 – 11.30	Information / Update Controls	Sima Baymani
11.30 – 11.45	Status Report RISE-IT – ETH Research Institutes looking for Synergies Evaluation of IT Services	Ronny Peterhans
11.45 – 12.00	Q & A / Closing	Ronny Peterhans

Registration process via Indico

- Indico is an established standard platform at PSI for managing events
- The mindset is, only those who participate have to register for the event (participation is mandatory for AIT employees) and in case of later non-participation, they also have to cancel their registration.
 - Planning basis for catering
 - Those who cannot come do not have to do anything
 - The changeover took place in parallel operation, so that the original appointment blocker was still available in Outlook
- We pass on feedback on functionality to Application Management
 - Error with calendar entry and reply
 - Language DE
- The mandatory query on topic contributions was deliberate in order to get results

Time	Topic	Responsible
09.00 – 09.10	Welcome & General Update	Ronny Peterhans
09.10 – 09.35	Information / Update AIT	Ronny Peterhans
09.35 – 10.05	5 Years with SCRUM – an Experience Report	Rico Besson

11.30 – 11.45	Status Report RISE-IT – ETH Research Institutes looking for Synergies Evaluation of IT Services	Ronny Peterhans
11.45 – 12.00	Q & A / Closing	Ronny Peterhans

- On 2 June, the **Swiss Roadmap for Research Infrastructures 2023** was published, presenting new national infrastructure projects that the universities and the ETH Domain intend to implement as a priority in the years 2025-2028, such as the HIPA upgrade project IMPACT (as well as SDSC+, EM-Frontiers).

<https://www.sbf.admin.ch/sbf/de/home/forschung-und-innovation/forschung-und-innovation-in-der-schweiz/schweizer-roadmap-fuer-forschungsinfrastrukturen.html>

- Various **parliamentary motions urge the Federal Council to answer questions regarding the ERI funding framework and Horizon Europe**, for example: (i) "Verhinderung einer Stagnation bei den Investitionen in Bildung, Forschung und Innovation; Interpellation (23.3690) von Nationalrätin Judith Bellaiche (GLP)" (new, not yet answered), Submitted 14 June 2023, <https://www.parlament.ch/de/ratsbetrieb/suche-curia-vista/geschaeft?AffairId=20233690>
(ii) "Horizon 2021-2027 and non-association of Switzerland. Supplement procedures to safeguard research and innovation in Switzerland" NR F.Fivaz (Green Party of Switzerland), the National Council adopted this proposal by 117 votes to 65 with 5 abstentions. The Federal Council had recommended that the motion be rejected. The matter now goes to the Council of States. <https://www.parlament.ch/de/ratsbetrieb/suche-curia-vista/geschaeft?AffairId=20214214>

An overview of political issues affecting the HERI sector can be found here

<https://www.netzwerk-future.ch/index.php?p=parlamentarische-geschaefte> with the option of subscribing to newsmail.

- The board of directors of **Zwilag** Zwischenlager Würenlingen AG (Zwilag) has appointed **Bruno Ulrich** as its new managing director. He succeeds Ronald Rieck. https://www.zwilag.ch/upload/cms/user/20230614_MM_Ulrich_DEFINITIV1.pdf
- The Swiss Academies of Arts and Sciences are launching the **National Open Research Data Prize** (ORD Prize). This new prize is intended to recognise researchers for innovative practices in this area and aims to drive the shift towards open research practices. In 2023, the theme of the National ORD Prize is "**Reusing Research Data**". Applications are open until **31 August 2023**.

General Update – DIRK (ETH Domain)

- On 24 May 2023, the Federal Council elected **Pascale Bruderer as Vice-President of the ETH Board**. She will take office on 1 January 2024, replacing the current Vice-President of the ETH Board, Barbara Haering, who will retire at the end of 2023.
<https://www.admin.ch/gov/de/start/dokumentation/medienmitteilungen.msg-id-95393.html>
- At its meeting on 24/25 May, the ETH Board **appointed** the following **PSI employees as professors**:
 - **Christian Wäckerlin** (Project Leader in the Molecular Nanoscience Group, PSD) to Assistant Professor of Physics at EPFL (SNSF Eccellenza Professorial Fellowship). He will carry out his project at PSI.
 - **Cristina Müller** (Group Leader Radionuclide Chemistry, BIO) appointed Titular Professor at ETH Zurich (Dept. Chemistry and Applied Biosciences)

General Update – DIRK (ETH Domain)

- By **releasing minimal reserves of the ETH Board**, the budgets of the institutions can probably be relieved by a further 0.5% (12 MCHF) in 2024. However, the budget outlook remains far below the additional costs due to inflation and the salary measures, which are not compensated by the Confederation. The PSI must therefore adhere to the agreed savings measures for 2024.

- On 23 May, the **annual meeting of the directorates of the four research institutes** took place at Eawag. The progress of the **ENRICH** project was presented, a contract for the future joint 4RI education centre (lead campus) was signed and the structure of the ETH Domain was discussed. The PSI was represented by the Director and the Division Heads Peter Allenspach, Alex Amato and Andreas Pautz.
- The **PSI 2-day retreat** will take place in Ittingen from 4-5 September 2023 (participants: all DIR, BL, LL/AL). The topics to be discussed include strategic developments at PSI and in the ETH Domain, PSI development plan 2025-2028, employee survey 2019 review/measures and outlook on the planned survey of 2024.
- **The 2nd PSI Leadership Day** took place on the afternoon of 6 June. The 5-hour event is important for PSI in view of the upcoming challenges regarding the budget and major projects and to promote the very important close cooperation between our various scientific, technical and administrative units. With around 250 participants, the various disciplines were well represented.

Time	Topic	Responsible
09.00 – 09.10	Welcome & General Update	Ronny Peterhans
09.10 – 09.35	Information / Update AIT	Ronny Peterhans
09.35 – 10.05	5 Years with SCRUM – an Experience Report	Rico Besson

Implemented Cyber Security Measures PSI

MetaCompliance Phish Reporting Outlook Plug-in

Metacompliance Phish Report Plugin

Here is the latest version of the instructions for using the Phishing Report button:

https://psi.service-now.com/now/nav/ui/classic/params/target/kb_view.do%3Fsys_kb_id%3D05f625ed87f875100a9131940cbb3556

02

Regular exchange with SWITCH -CERT, NCSC, Peers

<https://ITSec4RI.ch>

The screenshot shows the top navigation bar of the ITSec4RI website. It includes logos for Empa, eawag, and WSL, followed by a 'HOME' button and menu items for 'CYBER SECURITY', 'ÜBER UNS', 'MISSION', 'GREMIUM', and 'LINKS'. Language options 'DE' and 'EN' are on the right. The hero section features the ITSec4RI logo with a shield icon, the text 'CYBER SECURITY FOR THE RESEARCH INSTITUTES WITHIN THE ETH DOMAIN: EAWAG, EMPA, PSI & WSL', and a 3D graphic of a keyboard with a glowing padlock on one key.

Cyber Security

Protect. Defend. Secure. Your Digital Fortress.

Über uns

ITSec4RI steht für den Zusammenschluss der IT-Sicherheitsverantwortlichen der vier Forschungsinstitute des ETH-Bereichs, die sich mit ihrem Wissen und ihrer Erfahrung dafür einsetzen, die digitale Welt der Forschungsinstitute sicherer zu machen und Sie in allen Fragen der Cybersicherheit unterstützen.

Risk assessment PSI internal

Guidelines & Policies

Limited knowledge and implementation of existing guidelines and policies

IT-Asset Management

- Lack of updates and patches
- Reduced control over security
- Increased attack surface and attack vectors

Security Incident Detection & Cyber-Response

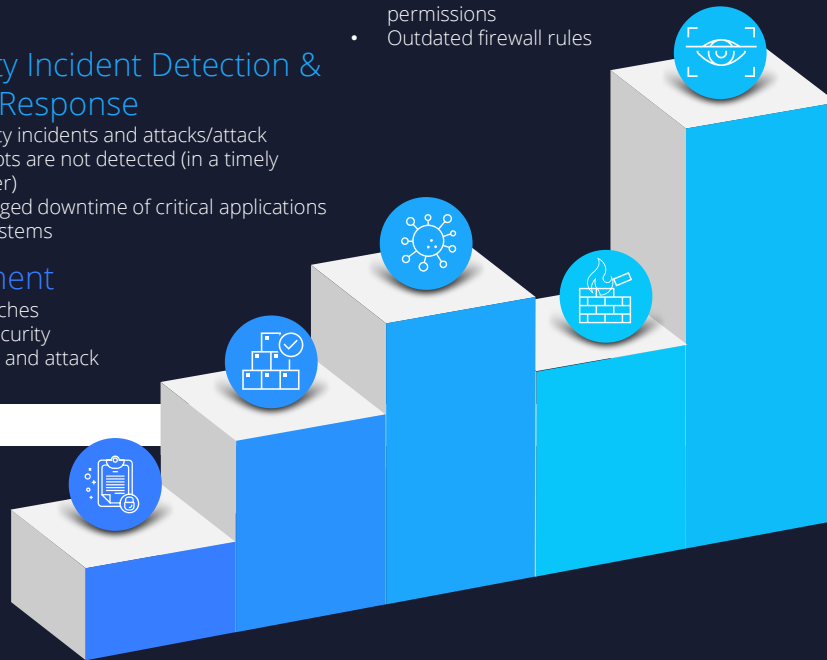

- Security incidents and attacks/attack attempts are not detected (in a timely manner)
- Prolonged downtime of critical applications and systems

Access-Rights & Firewall Rules

- Misuse of access permissions
- Outdated firewall rules

Vulnerability-Management

Vulnerabilities are not identified and remedied (in a timely manner)

Biggest challenges at PSI:

- There are several (IT) units with partly different needs
- Trade-off between governance and implementation expertise/resources
→ *risk-based approach*
- Paper only provides limited protection against security incidents
- Consideration of the constantly changing threat situation

"GUARDIANS" - Guaranteeing Uncompromised Academic and Research Data Integrity And Network Security

IDENTIFY

- Assessment of values, systems and data
- Change management process
- ISMS as a risk management framework
- Risk assessments
- Contact with SWITCH-CERT/-CSOC, NCSC and peers from the community

PROTECT

- Directives and guidelines
- User profiles, access controls and authentication mechanisms (IAM, MFA, ZTNA)
- Firewalls, intrusion prevention systems and other network security controls (NAC)
- Data encryption
- Awareness trainings

DETECT

- Security monitoring tools
 - Intrusion detection systems and protocol analysis
 - Malware detection
 - Incident response procedures (PSI-CSIRT)
 - Ongoing vulnerability assessments and penetration tests
- Community-Security-Operations-Center

RECOVER

- Backup- and Disaster-Recovery-Plan
- Tested backup and recovery procedures
- Checks after an incident

RESPOND

- ICT Emergency Management
- Exercises and simulations
- Containment and mitigation of the impact of security incidents
- Liaison with relevant stakeholders, law enforcement and third-party vendors

Generally a risk-based approach!
Ongoing re-prioritization based on changing risks

CONTINUOUS IMPROVEMENT

Security controls, policies, and procedures are regularly reviewed and updated to reflect new technologies, industry standards, and evolving threats.

We stay abreast of the latest security threats, trends and best practices by continuously monitoring industry reports and participating in relevant communities.

Audits and assessments are conducted regularly to evaluate the effectiveness of the safety strategy and ensure compliance with relevant regulations.

A culture of continuous learning and improvement is fostered by providing ongoing safety training and awareness programs for employees.

Necessary Cyber Security Measures PSI

(not final)

Together for a safe PSI!

GUARDIANS

voraussichtliche **Einsparung PSI**
gesamt **CHF 256'414.80/Jahr**

The old prices (offer manufacturer HP with subaccordant Global IT AG) were questioned by AIT. Therefore, clarifications and negotiations with the BIT/BBL, the ETH and the manufacturer HP have taken place in recent months. This has resulted in a new offer.

Further clarifications on the prices charged by Global IT AG in the last 4 years are being worked on by AIT and AFD. Afterwards a debriefing with the offering parties will take place.

Negotiations are also currently underway with the BIT/BBL regarding monitors, which will result in further potential savings for PSI.

* In view of the Windows 11 migration in 2024/2025, many more devices will have to be replaced than the normal annual requirement, which is favored by the 40% reduction from the hourly base model.

Scrum – 5 years field report

IT Quartalsinfo – 29.08.2023

Content:

- Scrum (Quick Refresher)
- Scrum Key Points
- Implementation & Experiences
- Conclusion
- Questions/Discussion

Context:

- Software development team at CPT
- 5 FTE
- Main Focus: Treatment Planning Systems
- Certified Scrum Developers

Scrum Key Points (I)

- 3 Roles:
 - Product Owner (1 FTE)
 - Development Team (3 – 9 FTE)
 - Scrum Master (1 FTE)

- 5 Events
 - Sprint (2 – 4 Weeks)
 - Sprint Planning (1/2 – 1 Day)
 - Daily Scrum (15 Minutes)
 - Sprint Review (2 – 4 Hours)
 - Sprint Retro (1 – 2 Hours)

- 3 Artifacts
 - Product Backlog
 - Sprint Backlog
 - Increment

- 4 Important Concepts

- Time Boxed
- Scrum Values (commitment, focus, openness, respect and courage)
- Sprint Goal
- Definition of Done

- Scrum Guide End Note

“Scrum is free and offered in this Guide. The Scrum framework, as outlined herein, is **immutable**. While implementing **only parts** of Scrum is possible, the result is **not Scrum**. Scrum exists only in its **entirety** and functions well as a container for other techniques, methodologies, and practices.”

- 3 Roles:
 - Product Owner: 1 Person 0.4 FTE (1 FTE)
 - Development Team: 5 Persons 2.6 FTE (3 – 9 FTE)
 - Scrum Master: 1 Person 0.2 FTE (1 FTE)
- 5 Events
 - Sprint: 2 Weeks (2 – 4 Weeks)
 - Sprint Planning: 3 Hours (1/2 – 1 Day)
 - Daily Scrum: 15 Minutes (15 Minutes)
 - Sprint Review: 2 Hours (2 – 4 Hours)
 - Sprint Retro: 45 Minutes (1 – 2 Hours)
- 3 Artifacts
 - Product Backlog: Codebeamer Trackers
 - Sprint Backlog: Codebeamer Trackers
 - Increment: CI Build, manually triggered deployment

- We do **NOT** SCRUM 😞
- Highly dependant on level of maturity of defined PBIs
 - Well defined PBIs requires a lot of time of the DEV TEAM and the PO
 - No guidelines provided by the SCRUM framework
 - Measure: Not only pull 'ready' PBIs but also PBIs to be refined
- Time Boxed is difficult but important (here we can improve)
- Definition of Done very important for the quality of the product
- Collaboration inside (fun, progress) and outside (transparency, impact) the team improved a lot
- **We continue with NOT SCRUM 😊 !!!**

Questions/Discussion

AIT Quartalsinfo :: 29.08.2023

PM@PSI – Introducing unified and helpful PM processes at PSI

Guidance in managing a project

Unified understanding of phases & milestones and their meaning

Unified, integrated and modular PM training

Software tool ePPM

Enhance transparency: PM data on a common platform

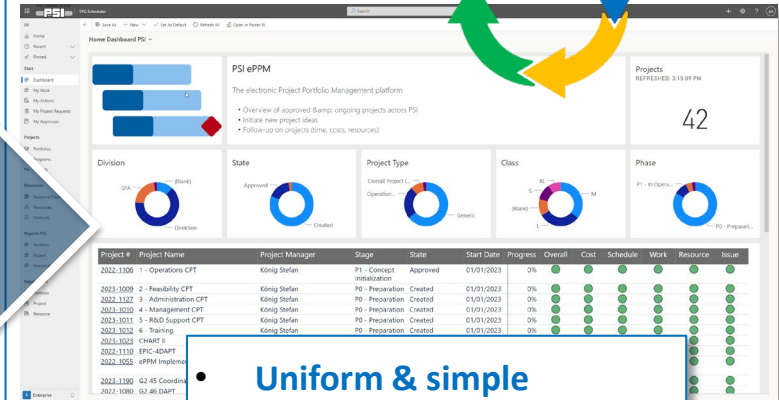

Digitalize booking/managing resources across departments

Present situation

- Laborious / Manually
- Data scattered
- Different tools
- No common
- No common standards

Improved situation

- Uniform & simple
- Common standards
- Common data base
- Planning & Analysis
- Overview & Transparency

Objectives & Goals

- Unified methodology & standards for PM at PSI
- Uniform and simple processes for initiation & execution of projects
- Overview & transparency of planned & running projects
- Overview of usage & demand of PSI resources

Deliverables

- **PM Handbooks** ('Navigationshilfe')
 - methodology, processes, standards
- **PM Directive (Weisung)**
 - roles, responsibilities, competencies, guidelines
- **Training concept**
- **Supporting software tool** to support methodology & processes
 - project management (planning, controlling)
 - portfolio management (selection & initiation, monitoring, resource handling)
 - corresponding (approval) processes
 - reporting, status overviews

Guidance in managing a project

Unified understanding of phases & milestones and their meaning

Unified, integrated and modular PM training

Enhance transparency: PM data on common platform

Digitalize booking/managing resources across departments

PM Handbook(s)

- PSI specific
- Compatible with PM standards
- 'Navigation Help' for project leaders

PM Directive (Weisung)

- Compatible with Signature & Competencies Directive
- Incorporates Heterogeneity of Project Landscape at PSI

ePPM Platform

- for Line- and Projectmngt
- Aggregate project data
- Achieve max. user acceptance and benefit

PM Training (Schulung)

- Modular building blocks
- E-learnings
- Start ~Q2 2024

ePPM – electronic Project Portfolio Management

PM@PSI – Status, Timeline, Pilot Phase

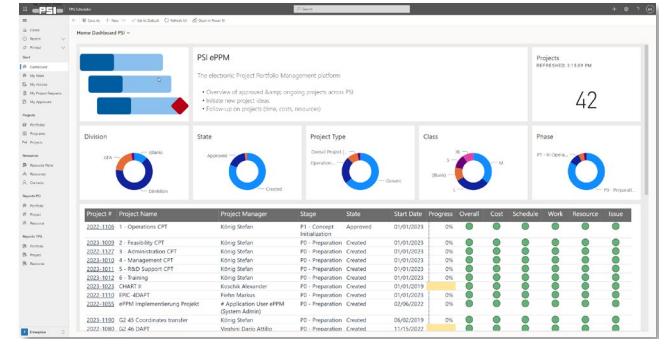

Status

- **Directive, manuals** ('Handbook'), **training** readily prepared for testing
- **ePPM platform** main configuration ready
- **Pilot phase** started
- Gradual addition of further pilot users (PM Basic training + onboarding)

Goals of the pilot phase

- **Evaluation of practicability** of directive, manuals, training & platform
- **Identification of PowerUsers** in Divisions
- **Collection** of real project and operational data
- Further detailed configurations in the ePPM platform

- **User interface & usage requiring little training**
 - Simple & self-explanatory operation
User-friendliness & user acceptance
 - Clean & simple user interface
yet extensive functionality for the savvy user
- **Planning functionality (rough to detailed planning)**
 - Schedule | Costs | Resources
 - Detailed planning options (essential for large projects)
 - **Resource demand is in the focus**
(no admin. overhead by reserving/blocking/releasing resources)
- **Portfolio/Program Views**
 - Summary of multiple project data
 - Structured overview of the PSI project landscape
- **Reporting functionality**
 - Extensive and flexible

- **MS Power Platform based solution**
- **Cloud-based & easy integration with MS365**
- **High configuration flexibility**
- **Small vs. large-scale planning:**
 - TPG Scheduler (Web-UI)
 - Project Classic (in Web-UI or Desktop Client)
- **Reporting via PowerBI (very powerful)**

The screenshot displays the PSI TPG Scheduler interface. The left sidebar contains navigation options: Home, Recent, Pinned, Start, Dashboard, My Work, My Actions, My Project Requests (highlighted), My Approvals, Projects, Portfolios, Programs, Resources, Reports PSI, Reports TPG, and Resource. The main content area shows a table of project requests under the heading 'My Project Requests'. A red circle highlights the '+ New Project' button in the top navigation bar, with a tooltip that reads 'New Project' and 'Create a new Project record.'. A blue callout box at the bottom of the image contains the text 'Create projects'.

Full Project Description

GFA Führungskräftetreffen

31. Mai 2023
Trotte/ Villigen

Detailed Description

Objectives

- Highlight motivation for ePPM
- Show Status
- Show Usage

Deliverables

- Presentation
- Live-Demo if possible

Out-of-Scope

- Detailed ePPM tool training
- Discussions about specific projects

Staffing status/update/changes

- Recent:
 - Basil, Jan and Christian joined
 - Stephan has retired, Leo a.i.
- New
 - Leo officially dept Deputy.
 - Krisz will move sideways

Key to Fixed Term Roles

EU Funded
PSI Funded fixed term
Swiss Funded initiatives

Relocation to OBBA in September

- Top floor of the dark tower in the East
- Hot desk scenario, 'rules' being discussed in a parallel meeting now

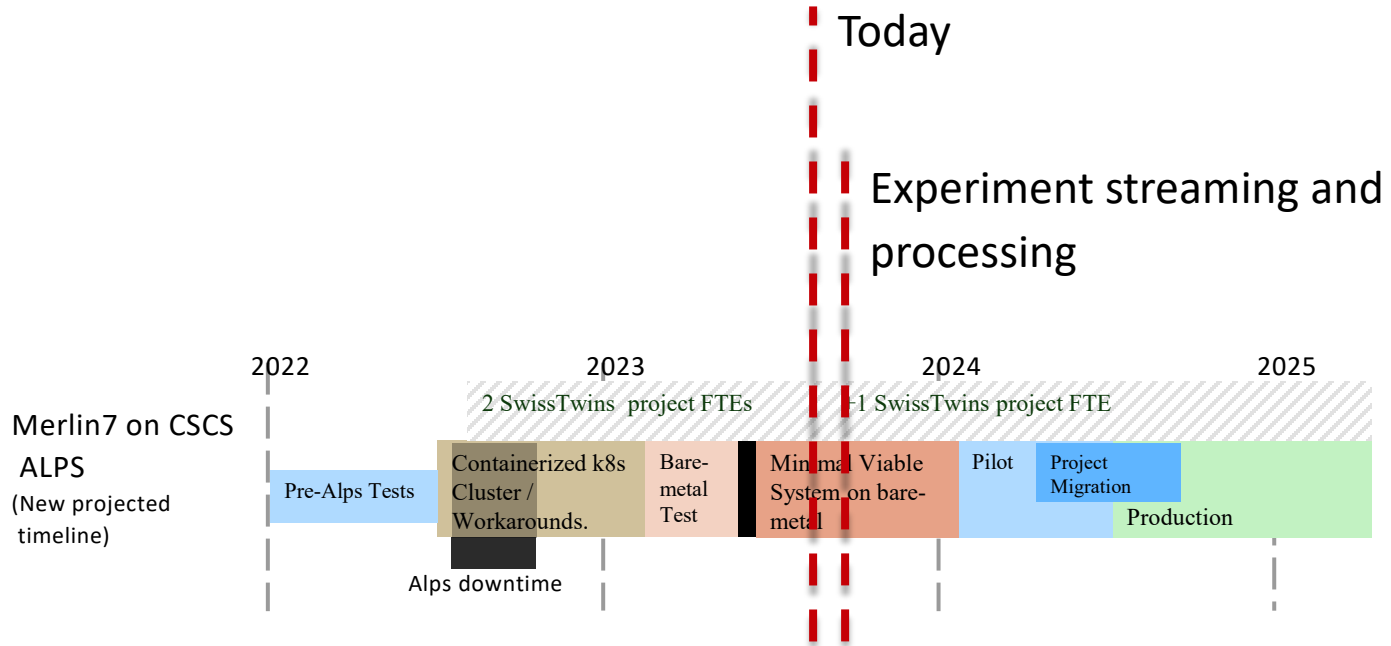

TransAlps and SwissTwins

- In the July DIRK a funding model and source were agreed for 2024 and 2025
- The new resources will give us approximately double the CPUs and 33% more storage at an annual cost of circa 1MCHF/yr
- Merlin6 main storage warranty extended till end of 2024 out of “an abundance of caution”
- Background Article in Technical Publication April 2023.
<https://www.hpcwire.com/2023/04/05/into-the-alps-what-exactly-is-the-new-swiss-supercomputer-infrastructure/>

TranAlps project progress

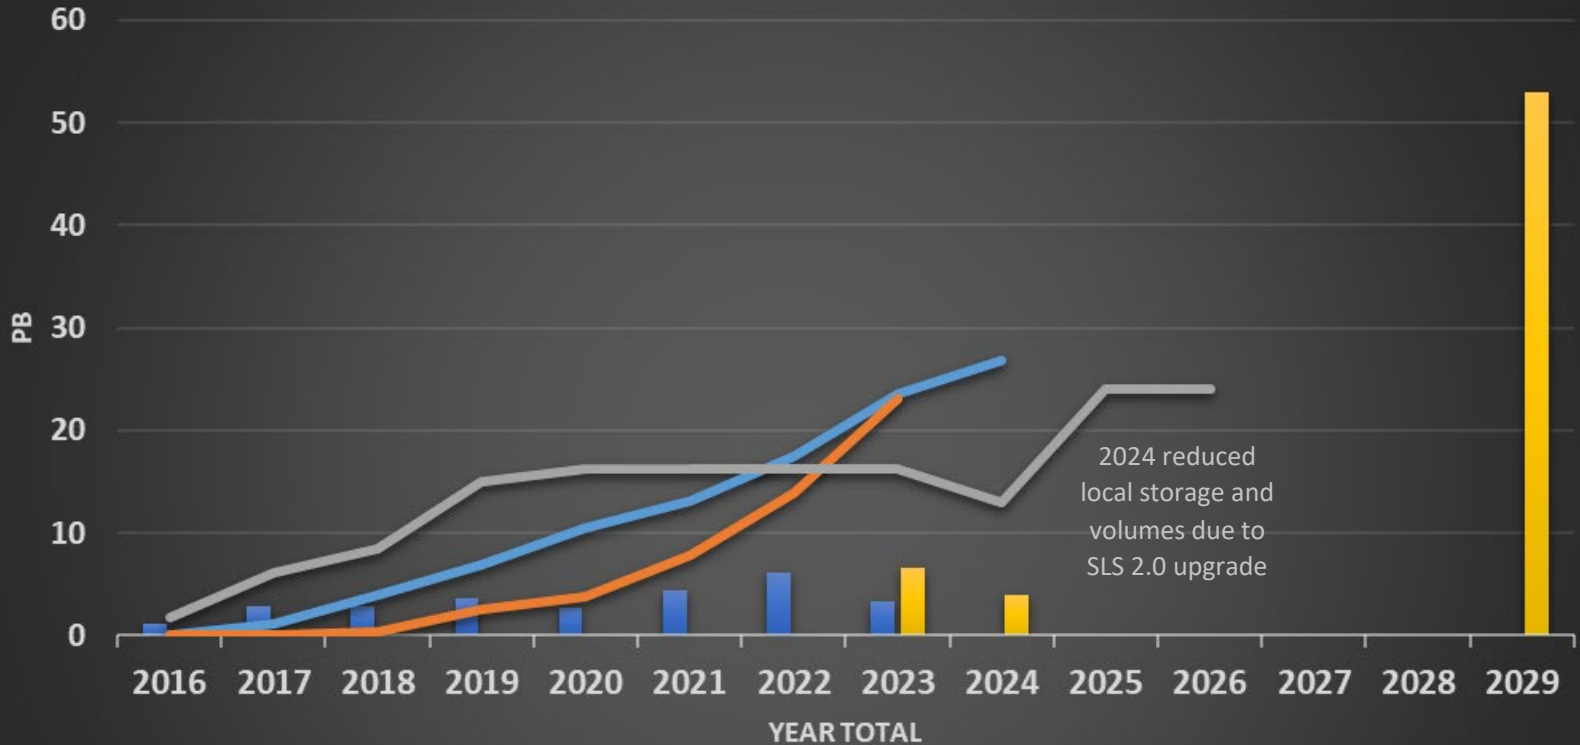

- First version of status page online
- all k8s clusters updated to 1.26.3
- outcome from last international SciCat dev meeting hosted in UK:
 - focus on search functionalities
- Statistics from SciCat based on metabase
- new k8s cluster (infrastructure), dedicated to mongo backup
- Improved documentation
- Scaled backend (both SciCat and SciLog) to improve availability and response time
 - session persistency guaranteed by MongoDB

The screenshot displays a status page titled "Data curation services status" with a "Current status" indicator. The main heading is "All Systems Operational" in green. Below this, two columns of service status are shown: SciCat and SciLog. Each service has a list of components, all of which are marked as "OK".

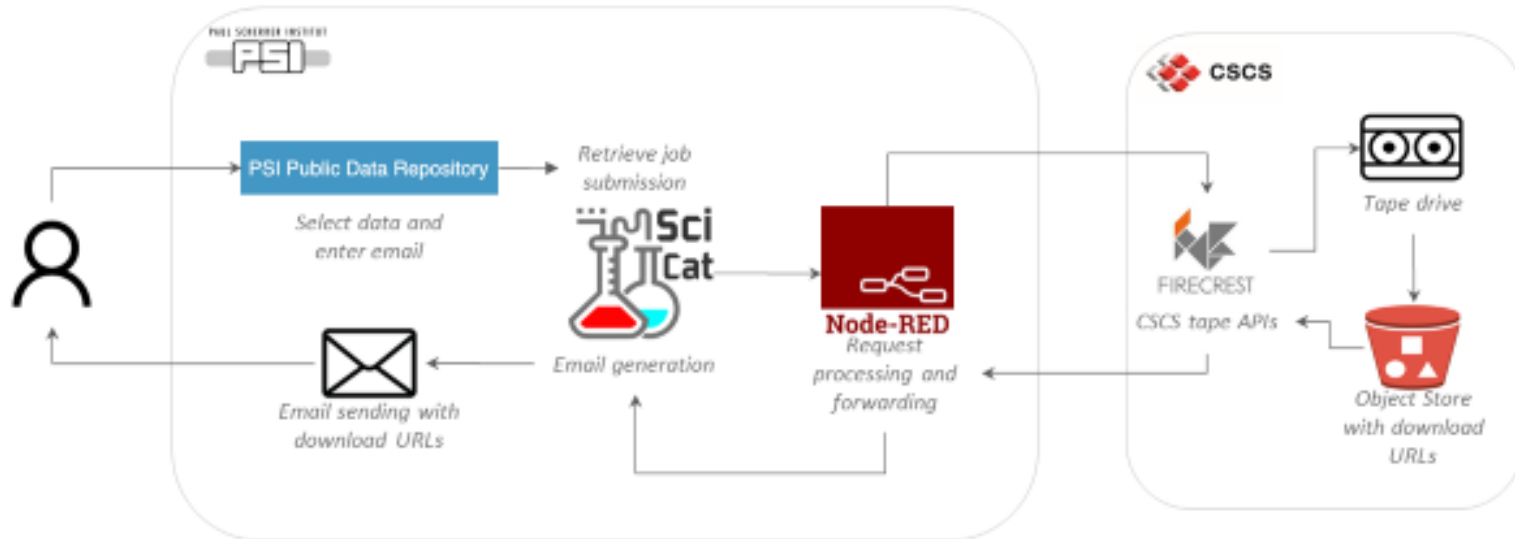

Service	Component	Status
SciCat	API	OK
	UI	OK
	OAI-PMH	OK
	DOI	OK
	DUO Sync	OK
SciLog	API	OK
	UI	OK
	DUO Sync	OK

PSI data volumes progress....

Current recovery of data from PSI

- Manual process to get data requested and staged at PSI for processing or at CSCS for download (and processing in the future)

- Data is not currently automatically made public at end of embargo period.....

- <https://intranet.psi.ch/en/ord> PSI specific information (area still under development)
- <https://ethrat.ch/en/eth-domain/open-research-data/> ETH ORD program details
- <https://ethrat.ch/en/the-five-measures-in-details/>
 - Measure 1
 - Contribute (< 30k, regular calls)
 - Explore (< 150k one more call)
 - Establish (< 1.5M deadline passed)
 - Measures 2 – 5 specialised calls.
- Swiss universities parallel call open.
 - Similar scheme but different timeline

ORD: The five Measures in details

Measure 1: Calls for Field-Specific Actions

Measure 2: Coordination of Access to Research Data Management
(RDM) Services & Infrastructures

Measure 3: Development of Online Course Material for RDM Training

Measure 4: Information on Legal Questions related to ORD

Measure 5: Career Paths for ORD Professionals

Overall overview

43 projects so far:

- 28 Contribute (excluding project that withdrew)
- 13 Explore
- 2 Establish

Estimated that around **additional 45-50 projects** to be selected in future calls

- Majority of projects have started **already or starting in September/October**
- Few Contribute projects being completed: final reporting

Overall: number of projects by institution

■ ETH Open Research Data (ORD) Program

Timeline: next deadlines

6th call Contribute: mid-December 2023

2nd call Explore: February 2024

7th call Contribute: mid-April 2024

8th call Contribute: early September 2024

End date all projects (without no cost-extensions): **By summer 2026**

SLS Server room migration to WHGA progress

- RA migration fully underway

- As preparation for SLS2 tests and operations, 72 single mode fibers (that translates into 36 network connections) between WSLB and WHGA have been laid down in July.
- Several services also further tested e.g. data acquisition tests from SLS direct to WHGA servers and storage.

- SLS User Beam ends 25th of September, shutdown on 30th of September
- PSIM on 15th of September for general information update

- Beamlines are intensively collecting data before the start of dark time
 - Especially the Debye and PXIII new/upgraded beamlines

—

New access rules to SLS during DT

- During dark time whole SLS building special regulation (Exception Passerelle and offices/floor at offices)
 - Extra “Sicherheitsbelehrung” to be signed
 - Some details need to be refined
 - Extra “Helmpflicht” below crane
 - Extra “aktiven medizinischen Implantaten“ gesperrt. Permanent magnets
- New controlled zones on the floor for equipment from the tunnel
- During commission (starting End Dec 2024) whole SLS building controlled zone
 - Meeting rooms not PSI wide bookable (to be done)
 - Also offices need dosimeter
- Installation work of heavy equipment (all tunnel work, larger installation at beamlines, not referring to use of equipment at the beamlines)
 - Not alone
 - During regular working hours (7:00 – 17:00), or info via DAM Meeting

credits:
Frithjof

SLS Beamlines Controls Contacts

Sector	Beamline	Beamline Scientist	Beamline Technician / Engineer	Controls Contact
X01DA	Debye ↗	Adam Clark	Stephan Hitz	Alvin Acerbo
X01DC	IR ↗	Guy Matmon ↗	/	LukaDebenjak
X02DA	s-TOMCAT ↗	Marco Stampanoni ↗	Gordan Mikuljan ↗ / Philipp	TineCelcer

Controls in Numbers: Operational Infrastructure

- 6(+1) Facilities (Cryo, ESI, HIPA, Proscan, SwissFEL, SLS(2))
- 28 Beamline/Endstation Subnets
- 477 VM's on GFA cluster

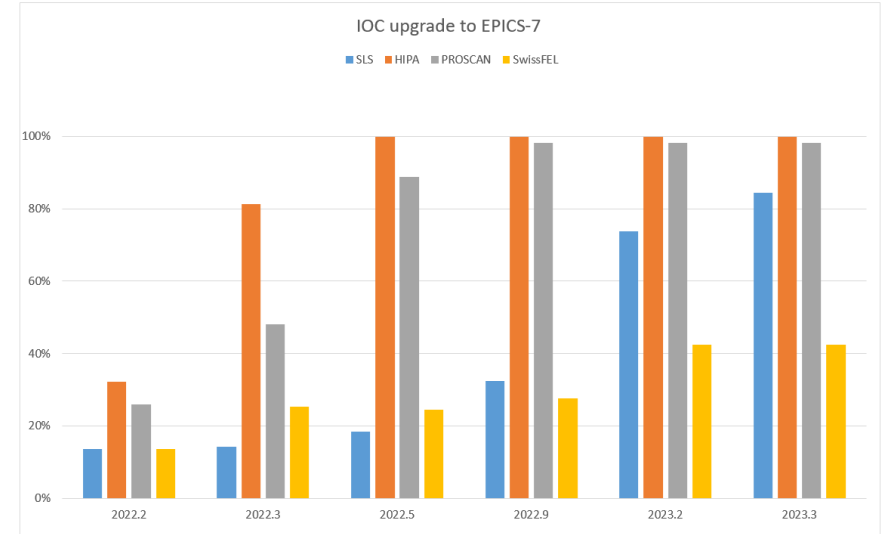

- 657 RHEL7 systems
- 63 RHEL8 systems (ESI platform IOC's already migrated)

- 41 WinSRV2016 systems (39 CamSRV, 2 Beckhoff Twincat)
- 18 WinSRV2019 systems (13 CamSRV, 5 Beckhoff TwinCat)
- 7 Win7/Win10 desktop systems (not ideal) (4 MX, 2 TOMCAT, 1 test)

Controls in Numbers: EPICS 7 at PSI

- Major endeavor to migrate from EPICS 3.14 to EPICS 7 across all facilities (EPICS base, drivers etc)
- In total 1191 of 1995 IOCs (60%) are upgraded to EPICS 7
- EPICS 7 will be the only version used after the SLS 2 Dark Time
- New: 107 SF PowerBrick IOCs migrated! *SF = 51% migrated*

SLS	HIPA	PROSCAN	SwissFEL
84%	100%	98%	42%

Slide: E.Zimoch. Numbers are provided by D. Zimoch after each SLS shutdown

Ongoing Activities (Selection)

- Finalize transition to EPICS 7
- Encourage and support RHEL8 migration
- Prepare for RHEL9 impact
- General life cycle management
- Prepare for SLS2 (steep ramp up in 2024)
- Increase monitoring of our systems for preventative and proactive measures
- Unify backend services (archiver, data and image buffer backends into one)

- Recruitment
- 2022: 4 vacancies, 2 retirements
- 2023: 4 positions filled, 2 remain
- 2024: +3 retirements

Major loss of knowledge and work velocity

- **Seek strategic collaboration and partnership with AIT and AWI, increase exchange**
