

# PIONEER Collaboration Meeting #2

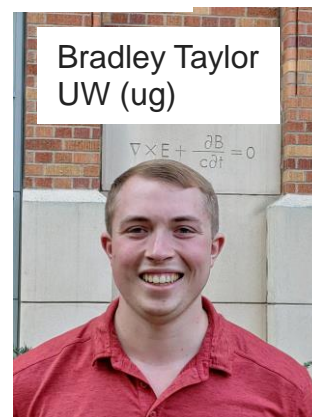

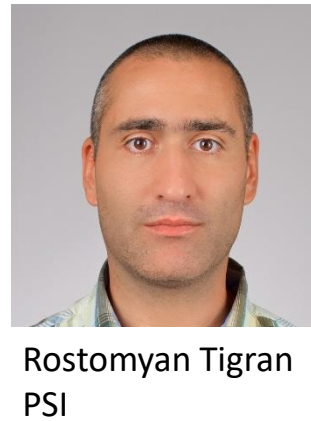

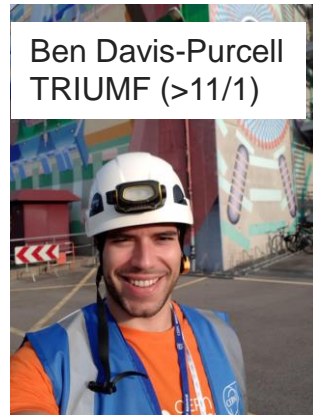

David Hertzog

October, 2023

Seattle

- **Welcome new members!** Let's all go around and Introduce (or Re-Introduce) ourselves since we have only been meeting on Zoom
  - [See this list !](#)
- **Meeting Code of Conduct**
  - I'd like us to have a **vigorous discussion environment**, but do not "**hog the mic**", let others talk, but also don't be shy to initiate conversation; it might be the thing that generates a break through !
  - Of course, **everybody is welcome here** and we especially **value the voices and participation of younger members** of the collaboration. After all, PIONEER will be a long campaign and you will be running it
- **Speakers:** Your time allocation **includes** discussion, so please allow 5 (for short) and 10 (for longer) minutes at least for discussion.
- **Chairs:** Moderate the times please. We all need coffee and lunch

# Newbies: Welcome!!!

# Goals of the meeting and logistics

- Discuss and understand the **current baseline design**
  - Please think about “will this work for our goals”
  - Note: We have several talks called “Discussion...” These are NOT talks. These are open conversations usually at the end of a technical session. Please participate vigorously!
- Learn about **updates on various technical choices**
- Understand what the **Simulation and proto-Analysis Frameworks** can already do and how you might use them to advance our design
- Provide a **Workshop for computing**
- Get folks together on **lab work in prep for PSI runs** and similar where multi-institute collaboration is ongoing
- Develop a **formal Collaboration** organization
  - Institute Board reps is key, then other boxes ... see Wednesday
- Understand the latest reports and funding opportunities and **prepare for PSI BVR** and our **2024 beam-time request** (if any)

# The Practical Matters ...

- All coffee breaks are covered
- Collaboration dinner is covered, except if you wish to buy a bottle of wine (for table chare) or get a beer
- Nicole – out admin – set all this up. A HUGE tanks
- Svende – organized a lot of this program, Indico, etc, etc. A Huge Thanks

**LET'S GET TO THE SCIENCE !!**
