

LSC Mini Retreat

Tue 30.04. 2024, PiA

The main aim of this mini retreat is to get together in person, to see who is in LSC, what has changed and have a starting point for future discussion. It should be more an informal meeting and not a scientific conference. A specific focus will be the proposal system for beamtime. How can we improve the proposal submission system and the review process. Another topic for exchange will be the procurement process at PSI. The meeting consists of a first part only for the group leaders, a second part for all (including staff scientist, PhD, postdocs, technicians, engineers, group leaders etc.). It is understood that the matrix work for the SLS 2.0 project has priority.

It is not a virtual meeting, i.e. there will be no zoom link.

Please register by Wed 24th April 2024 at <https://indico.psi.ch/e/LSCminiretreatspring2024>

Program

	Time	What	Place on 1 st floor
LSC group leaders	12:00 – 12:40	Arrival group leaders / sandwich lunch	Curie 3 / foyer
