7904 - updates

AWI Department update meeting 2024.02.05 / PSI

Ra

- RHEL8 transition ongoing
 - no major issues, some small issues still being ironed out
 - some p-modules are incompatible
- Data retention policy *still* under discussion
 - waiting for PSD green light

SLS

Test beamline setup

- DAQ servers installed
- test filesystem ready
- switches prepared
- missing cables (network team ordered them)

Preparing plan for filesystem and permissions schema

Instabilities in filesystem exports nodes, under investigation

SwissFEL

Ongoing support operations on Furka

- special server installation, with dedicated patching

Work on the new SSD storage is continuing

- one SSD already got replaced :(
- integration with old SLS storage (Aramis replacement) successful
