

SynFuels Final event and ReFuel.ch Platform II Meeting

Wednesday, 8 May 2024 - Wednesday, 8 May 2024

Book of Abstracts

Contents

Project Summay	1
Electrochemical Ethylene synthesis	1
Efficient Green Hydrogen as Basis for Renewable Jet Fuel	1
Q&A	1
Platform II Introduction	1
Electrochemical Ethylene synthesis	1
Hydrothermal liquefaction and Methanol-based synthesis routes	1
Ethylene to Jet fuel	1
Q&A	2
Process design & technology upscaling	2
Q&A	2
Economic & Environmental Assessment	2
Q&A	2
Catalyst Characterization, Process Analytics	2
Q&A	2
Contaminants in CO ₂ and MeOH	3
Requirements for Co-Electrolyses	3
Requirements for MeOH synteseis	3
Requirements for MTO process	3
Discussion	3
Co Electrolysis	3
MeOH synthesis Membrane Systems/ fluidized bed systems	3
HTL	3

MTO standard and photon acitvated processes	4
Discussion	4

1

Project Summay

Corresponding Authors: joerg.roth@psi.ch, bjoern.niesen@empa.ch

Electrochemical Processes / 2

Electrochemical Ethylene synthesis

Electrochemical Processes / 3

Efficient Green Hydrogen as Basis for Renewable Jet Fuel

Corresponding Author: juan.herranz@psi.ch

Electrochemical Processes / 4

Q&A

5

Platform II Introduction

Corresponding Author: joerg.roth@psi.ch

Electrochemical Processes / 6

Electrochemical Ethylene synthesis

Thermochemical Processes / 7

Hydrothermal liquefaction and Methanol-based synthesis routes

Corresponding Authors: tilman.schildhauer@psi.ch, davide.ferri@psi.ch

Thermochemical Processes / 8

Ethylene to Jet fuel

Thermochemical Processes / 9

Q&A

Overarching Topics / 10

Process design & technology upscaling

Corresponding Author: christian.bach@empa.ch

Overarching Topics / 11

Q&A

Overarching Topics / 12

Economic & Environmental Assessment

Corresponding Authors: christian.bauer@psi.ch, carlos.gomez@empa.ch

Overarching Topics / 13

Q&A

Overarching Topics / 14

Catalyst Characterization, Process Analytics

Corresponding Author: maarten.nachtegal@psi.ch

Overarching Topics / 15

Q&A

Biomass as Feed - contaminants and requirements / 16

Contaminants in CO₂ and MeOH

Biomass as Feed - contaminants and requirements / 17

Requirements for Co-Electrolyses

Corresponding Author: juan.herranz@psi.ch

Biomass as Feed - contaminants and requirements / 18

Requirements for MeOH synteseis

Corresponding Author: tilman.schildhauer@psi.ch

Biomass as Feed - contaminants and requirements / 19

Requirements for MTO process

Corresponding Author: jeroen.vanbokhoven@psi.ch

Biomass as Feed - contaminants and requirements / 20

Discussion

Catalytic Processess within reFuel.ch; Materials, active centers, knwons and unkowns / 21

Co Electrolysis

Corresponding Author: juan.herranz@psi.ch

Catalytic Processess within reFuel.ch; Materials, active centers, knwons and unkowns / 22

MeOH synthesis Membrane Systems/ fluidized bed systems

Corresponding Author: tilman.schildhauer@psi.ch

Catalytic Processes within reFuel.ch; Materials, active centers, knowns and unknowns / 23

HTL

Catalytic Processes within reFuel.ch; Materials, active centers, knowns and unknowns / 24

MTO standard and photon activated processes

Corresponding Author: jeroen.vanbokhoven@psi.ch

Catalytic Processes within reFuel.ch; Materials, active centers, knowns and unknowns / 25

Discussion
