

Chief Data & AI

Thursday 31 October 2024 15:10 (10 minutes)

The UNICC AI Hub is committed to enhancing Predictive and Generative AI capabilities to support UN partners. By fostering strategic partnerships and adopting a cloud-first approach, UNICC aims to ensure robust data management, ethical compliance, and optimal model performance. This initiative addresses key technical challenges using High-Performance Computing (HPC), promoting a transparent and responsible AI governance framework. Join us in exploring how these advancements can drive impactful solutions for the UN community.

Presenter: DANDAPANI, Anusha (United Nations International Computing Centre)
