

Pores, Patches, and Burried Surfaces: Samples for future XPS and XAS studies

Wednesday 13 November 2024 16:40 (10 minutes)

I'll present some atmospheric chemistry science cases and options to answer key questions with X-ray excited electron spectroscopy. This talk focuses very much on sample development that mimic atmospheric surfaces and allow systematic studies.

Significance

Presenter: BARTELS-RAUSCH, Thorsten (PSI - Paul Scherrer Institut)

Session Classification: Solids and solid interfaces
