Bits to add

- Team charters : https://psich.atlassian.net/wiki/spaces/SCD/pages/56557595
  - Now read only.

- OBBA second floor and air treatment.
  - Active air treatment including dehumidification
  - Opening the windows renders it ineffective.

- Interflex changes.

PSI HR/AFD: Time Management and Activity Recording in TIME (English version)

As a reminder: TIME will be activated on **Thursday, 1 August 2024** within the SAP portal. TIME will then replace Interflex for recording working time, attendance, absences, and activities.

Important:

- Interflex must still be used to record the July activities, i.e. by 10 August at the latest. After this date, Interflex will be blocked for data entry.
- Please do not enter any more absences in Interflex after 1 August. From 1 August, all absences must be re-entered in TIME.
- Absences already recorded in Interflex after 1 August 2024 do not have to be deleted.
- In TIME, activities are no longer approved by the line manager, but by the responsible account assignment object or grant managers.
