

Science is not open without code

Wednesday 22 January 2025 10:05 (40 minutes)

Kati Lassila-Perini has led the CMS open data initiative for its first 10 years, delivering close to 5 petabytes of research-quality data to the public domain. In this talk, she will share her experience on the importance of analysis preservation efforts. The audience will have the opportunity to reflect on different components of Open Science and the role of software in it, and see how analysis preservation skills bring benefits to individual researchers, research groups and the scientific community as a whole.

Presenter: LASSILA-PERINI, Kati
