

## Guided Tours

*Thursday 15 May 2025 15:30 (1 hour)*

We offer two different guided tours:

1. focusTerra - Earthquake Simulator

In the permanent exhibition of focusTerra, we explore the causes of earthquakes, watch tectonic plates move throughout our planet's history and talk about the scientific value of quakes. In the simulator you will experience earthquakes in a safe environment and learn what to do in a case of emergency.

1. Datacentre at ETH Zurich
