

Research programs and facilities on X-ray sensors and ASICs at SDICLab-Polimi

Monday, 12 January 2026 11:30 (5 minutes)

The research activities and facilities of the Semiconductor Devices and Integrated Circuits Laboratory (SDICLab) at Politecnico di Milano will be presented. Results and programs on silicon and compound semiconductor sensors together with the design of associated custom front-end electronics and ASICs will be summarized.

Presenter: BERTUCCIO, Giuseppe (Politecnico di Milano, Department of Electronics, Information and Bioengineering, Como, IT; National Institute of Nuclear Physics (INFN), Milan Section, Milan, IT)

Session Classification: Flash Talks
