ELIXIR AAI pilot - life sciences

Wednesday 20 March 2013 13:20 (25 minutes)

We give a technical demonstration of an open-source tool REMS that leverages federated identity management and automates the process of granting an entitlement for accessing a data resource. Pilot implementation of the tool has been made with the European Genome-phenome Archive (EGA) and Nordic genome-wide control data (NordicDB).

Presenter: NYRONEN, Tommi

Session Classification: Pilots & Projects I
