

- warm welcome to all participants and thank you for your participation
- after 2008: 2<sup>nd</sup> workshop
- goals:
  - overview on detector R&D activities at Swiss institutes
  - bring together “people working in the lab”
  - share experiences, find possible synergies
  - discuss impact on upgrade studies and new developments→ interesting talks and sufficient time for discussions
- detector R&D is driven by specific physics programmes and projects  
→ talks organized by projects, not by detector type
- many thanks to:
  - the speakers for their contributions and efforts
  - CHIPP and Laboratory for Particle Physics for financial support, PSI for hosting the workshop
  - Stefan Ritt for making the talks visible
  - Anita van Loon, the „good soul“ of our lab, for her help and support during organisation, preparation and realisation
