

An Introduction to Diamond Light Source and the material and magnetism beamline

Thursday, 22 May 2014 17:00 (1 hour)

In this presentation I will briefly presents the Diamond Light Source and the various research possibilities offered by the machine, then I will focus on the materials and magnetism beamline I16 illustrating the main features of the beamline. Finally I will present an example of research performed on I16 illustrating the kind of studies that we can perform.
