Overview of SCCER Heat-Storage Research and Development Efforts

Tuesday 4 November 2014 11:00 (30 minutes)

Following an outline of the motivation for heat storage in general and Switzerland in particular, the collaborators involved in the SCCER heat-storage research and development effort will be introduced. The objectives and current status of the projects on both low- and high-temperature heat storage will be described. Particular emphasis will be placed on explaining the relevance of the projects for the Energy Strategy 2050 and existing or potential industrial collaborations. The presentation will close with an outlook of future activities.

Author: Dr HASELBACHER, Andreas (Institute of Energy Technology, ETH Zürich)

Presenter: Dr HASELBACHER, Andreas (Institute of Energy Technology, ETH Zürich)

Session Classification: Storage of Thermal Energy
