

# JUM@P '11: Joint Users' Meeting at PSI 2011

## Thursday, September 15, 2011

### Plenary session - WHGA/001 (10:30 AM - 12:15 PM)

| time     | [id] title   | presenter              |
|----------|--|------------------------|
| 10:30 AM | [145] Welcome  | Prof. MESOT, Joel      |
| 10:45 AM | [105] In situ structure-function studies of metal catalysts                    | Prof. EVANS, John      |
| 11:30 AM | [41] Tomographic insight into the evolutionary assembly of the vertebrate head | Prof. DONOGHUE, Philip |

### Plenary session - WHGA/001 (2:15 PM - 6:20 PM)

| time    | [id] title  | presenter                          |
|---------|---|------------------------------------|
| 2:15 PM | [183] Award of PSI thesis medal and presentation: The artificial kagome spin-ice system: from building blocks to emergent monopoles | Dr MENGOTTI, Elena                 |
| 2:45 PM | [149] News from SLS   | Prof. VAN DER VEEN, Johannes Friso |
| 3:00 PM | [150] News from the PSI Users Association   | Prof. SCHOENFELD, Bernd            |
| 3:15 PM | [107] Control of electron flow and magnetism in atomically thin transition metal oxides   | Dr BORIS, Alexander V.             |
| 4:00 PM | Coffee  |                                    |
| 4:30 PM | [152] News from SINQ and SMuS   | Dr CLAUSEN, Kurt                   |
| 4:45 PM | [25] The SwissFEL X-Ray Laser Project   | Dr ABELA, Rafael                   |
| 5:00 PM | [106] Using SANS to probe the nano-magnetic structure and magnetic reversal of perpendicular recording media                        | Prof. LEE, Steve                   |
| 5:30 PM | [109] Magnetism and superconductivity in the iron-based superconductors LiFeAs and NaFeAs   | Dr LANCASTER, Tom                  |
