

Contribution ID: 29

Type: **Poster**

Fabrication of high aspect ratio gratings with reinforcing ribs for X-ray phase contrast imaging

Wednesday 13 September 2017 12:30 (2 hours)

Author: Ms HU, Yue (National Synchrotron Radiation Laboratory, University of Science and Technology of China, China)

Co-authors: Prof. LIU, Gang (National Synchrotron Radiation Laboratory, University of Science and Technology of China, China); Mr GUO, Liang (National Synchrotron Radiation Laboratory, University of Science and Technology of China, China); Ms HOU, Shuangyue (National Synchrotron Radiation Laboratory, University of Science and Technology of China, China); Mr CHEN, Xiangyu (National Synchrotron Radiation Laboratory, University of Science and Technology of China, China); Prof. TIAN, Yangchao (National Synchrotron Radiation Laboratory, University of Science and Technology of China, China); Mrs XIONG, Ying (National Synchrotron Radiation Laboratory, University of Science and Technology of China, China)

Presenter: Ms HU, Yue (National Synchrotron Radiation Laboratory, University of Science and Technology of China, China)

Session Classification: Lunch break & Poster session

Track Classification: Fabrication Methods
