

Id	Track / Title	Submitter
Biogeochemical Cycles in the Earth system – data and models		
29	Bromine, iodine and Mercury on the East Antarctic plateau: preliminary results from sampling along a traverse.	Giuditta Celli
49	The 1610 CO2 drop: Natural, Anthropogenic or Artefact?	Amy King
73	Arctic mercury increased at the Glacial-Holocene transition	Delia Segato
74	Atmospheric $\delta^{13}C_{CO_2}$ and $\delta^{13}C$ in planktonic foraminifera during the last 150 kyr reconciled by simulations including the carbonate ion effect on isotopic fractionation during calcite formation	Peter Köhler
79	Excess methane, ethane, and propane production in Greenland ice core samples and a first characterization of the $\delta^{13}C$ -CH4 and δD -CH4 signature	Michaela Mühl
88	High-resolution measurements of $\delta^{13}C$ -CH4 reveal heavy anomalies during enhanced CH4 emissions associated with Heinrich Events	Ben Riddell-Young
91	Recent increase of natural sulfur emission from the North Atlantic seasonal sea ice area reconstructed from the SE-Dome ice core, southeastern Greenland	Yutaka Kurosaki
110	Improving the interpretation of isotopic composition of oxygen in the atmospheric dioxygen trapped in ice core from biological experiments in closed controlled chambers	Clémence Paul
114	New joint isotopic analyses of N2O and NO3- in Antarctic ice cores for investigating the processes of N2O in situ production	Lison Marie Soussaintjean
130	Did Nitrification of Denitrification Cause the Deglacial N2O Rise?	Andy Menking
170	Isotopic Constraints on Holocene Carbon Cycle Dynamics	Thomas Bauska
180	Identifying Heard Island volcanic signals in the Mount Brown South ice core	Margaret Harlan
183	Greenland ice core organic matter indicators of local influences across the Arctic Circle Traverse	Juliana D'Andrilli
213	Spatial variability of ammonium deposition across the Greenland ice sheet and implications for past forest fire reconstruction:	Drake McCrimmon
217	History of atmospheric carbon monoxide over Greenland and Antarctica since preindustrial times	Rachael Rhodes
245	Law Dome 14CH4 measurements confirm revised fossil methane emissions estimates	David Etheridge
279	Millennial variations of atmospheric CO2 during the early Holocene (11.7–7.4 ka)	Jinhwa Shin
280	How and why does CO2 change? Oceanic records of carbon storage and pCO2 within and beyond the (current) reach of the ice cores	James Rae
297	Three-phased growth of atmospheric N2O concentration over the last century	Jinho Ahn

Glacial / interglacial dynamics, interglacials, and sea level		
83	The Mid Pleistocene Transition is due to a gradual rather than abrupt change in the climate system	Etienne Legrain
84	Centennial- to millennial-scale variations of atmospheric CO2 over Termination III and Marine Isotopic Stage 7	Etienne Legrain
87	Warmer Southern Ocean sea surface temperatures and a larger sea ice reduction during the Last Interglacial: New core measurements and model simulations	Louise Sime
120	Shifts in Greenland interannual variability lead Dansgaard-Oeschger abrupt warming by hundreds of years	Chloe Brashear
123	Greenhouse gas record from the Allan Hills Blue Ice Area for the penultimate deglaciation and last interglacial period	Julia Marks Peterson
141	Dansgaard-Oeschger events in climate models: Review and baseline MIS3 protocol	Irene Malmierca-Vallet
143	Beyond EPICA - a climate modeling perspective	Jyoti Jadhav
154	Mean Ocean Temperature during MIS6-5 Based on Noble Gas Ratios in the EDC Ice Core	Markus Ron Grimmer
167	Impurities throughout the EGRIP ice core – a microstructural perspective	Nicolas Stoll
186	High-resolution analyses of dust in the Dome Fuji deep ice-core from the LGM to mid-Holocene	Kumiko Goto-Azuma
219	Different Impacts of Antarctic Last Interglacial Ice Sheet Changes on West and East Antarctic Isotope Record:	Huiling Zou
234	The Hercules Dome Ice core project	Eric Steig
254	A high-accuracy Total Air Content setup: System performance and first results from Skytrain Ice Rise, Antarctica	Christoph Nehrbaß-Ahles
267	High precision reconstruction of $\delta^{13}C$ -CO2 and major greenhouse gas concentrations (CO2, CH4 and N2O) over marine isotope stage 9 – first application of a novel method	Florian Krauss
284	The Mid-Pleistocene Transition and precession cancellation in the Early Pleistocene	Daniel Gunning
291	Diatoms in the Skytrain ice rise, a complementary record to study the potential collapse of the West Antarctic Ice Sheet during the Last Interglacial period	Dieter Tetzner
307	The dust enigma – Phases of enhanced calcium concentrations in Skytrain Ice Core (Antarctica) during the last 100 ka	Helene Hoffmann

Ice dynamics, ice sheet instability and geophysics		
111	Towards continuous observations of ice microstructure by means of microstructure mapping and digital image processing	Miguel Angel Sanchez Moreno
159	Evaluation of surface mass-balance model performance at an ice core site on the Greenland Ice Sheet	Hans Christian Steen-Larsen
172	Inferring ice-core physical properties nondestructively from elastic P- and S-wave velocities	Nicholas Rathmann
195	Investigating brittle-ice behavior and onset in Antarctic ice cores in preparation for the Hercules Dome Ice Core Project	Samantha Barnett
206	Basal ice – a rich source on ice dynamics and ice sheet history	Dorthe Dahl-Jensen
227	Water Isotope Geochemistry and Glacial Climatology on the Juneau Icefield	Paloma Siegel
255	Visual Stratigraphy of the EastGRIP Ice Core	Julien Westhoff
259	Microstructural evidence for complex multi-scale deformation in the EastGRIP ice core	Johanna Kerch
261	Age-depth distribution in the larger Dome Fuji area from combination of radar internal layer stratigraphy and inverse modelling	Olaf Eisen
263	Stable, smaller ice cap in East Greenland shows presence of Eemian ice supported by radar, ice core data and model simulation	Iben Koldtoft
269	Exploring the impact of different past climatic forcings on Antarctic ice sheet evolution and dynamics:	Christian Wirths

Rapid changes and teleconnections		
34	The anatomy of past abrupt warmings recorded in Greenland ice	Emilie Capron
75	Abrupt Climate Change in Ice Core Records: Oscillations and Noise Induced Transitions	Guido Vettoretti
86	Bipolar impact and phasing of Heinrich-type variability	Kaden Martin
107	Sea surface temperature variability over the western Indian Ocean sector of Antarctica during the past two centuries and its linkages to tropical extratropical climate modes	Tariq Ejaz
147	Bipolar volcanic ice-core synchronization of the last glacial cycle	Anders Svensson
173	Understanding the heterogeneous global climate imprint of Dansgaard-Oeschger Events and Heinrich Events - categorizing the events	Jonathan Ortvad Melcher
174	Understanding the heterogeneous global climate imprint of Dansgaard-Oeschger Events and Heinrich Events - mapping out the anomalies	Sune Halkjær
208	Dansgaard-Oeschger events as coupled climate-carbon cycle oscillations	Bradley Markle
300	Modeling absolute temperature during the last glaciation to constrain the magnitude of abrupt climate shifts	Hayley Bennett

The Oldest Ice challenge, and the preservation of climatic signals in the deepest ice		
35	Gas loss effect in deep ice cores: consequences for ice core dating	Amælle Landais
47	Age-depth model using radar measurements at Little Dome C	Ailsa Chung
76	Melting temperature of ice and total gas content of water at the ice-water interface above subglacial Lake Vostok	Vladimir Lipenkov
95	Molecular diffusion mechanism of atmospheric gases trapped in ice-lh	Yeongcheol Han
96	High-resolution subglacial topography around Dome Fuji, Antarctica, based on ground-based radar surveys conducted over 30 years	Shun Tsutaki
129	Developing continuous flow analysis capability for Million Year Ice Core analysis.	Christopher Plummer
149	Evaluating in situ microbial production of greenhouse gases in subglacial environments of Greenland Ice Sheet: new insights from the Camp Century basal ice section	Lisa Ardoin
152	Impurities in ice as measured by laser ablation – extracting the climate signal from high resolution line scans through use of a conceptual model and comparison with meltwater analysis	Piers Larkman
162	Laser Ablation sampling for water isotopic analysis on ice cores	Eirini Malegiannaki
188	Development of crystal orientation fabric in the Dome Fuji ice core in East Antarctica: implications for the deformation regime in ice sheets	Shuji Fujita
192	The chemistry of the deeper section of the TALDICE ice core.	Mirko Severi
207	New early Pleistocene atmospheric carbon dioxide and methane data from the Allan Hills Blue Ice Area, Antarctica	Julia Marks Peterson
228	Effective diffusivity of sulfuric acid in Antarctic ice cores	Tyler Fudge
238	Site selection for Australia's Million Year Ice Core Project	Tas van Ommen
249	A new Australian gas lab for the Million Year Ice Core project	Daniel Baggenstos
252	Time-scale reliability and climate features in a network of East Antarctic water isotope records	Isobel Rowell
275	Progress on optimally recovering the water isotope signal in the deepest section of ice cores	Fyntan Shaw
