Type: Oral

## Optimization of crystal growth and material parameters through in-situ energy-resolved neutron imaging

*Monday, 27 May 2019 16:45 (15 minutes)*

**Primary authors:** TREMSIN, Anton (University of California at Berkeley); Dr PERRODIN, Didier (LBNL); LOSKO, Adrian (Los Alamos National Laboratory); VOGEL, Sven (Los Alamos Neutron Science Center); LONG, Alexander (Los Alamos National Laboratory); SHINOHARA, Takenao (Japan Atomic Energy Agency); OIKAWA, Kenichi (Japan Atomic Energy Agency); KAI, Tetsuya (Japan Atomic Energy Agency); Dr PETERSON, Jeffrey (LANL); Prof. DERBY, Jeffrey (University of Minnesota); KOCKELMANN, Winfried (Rutherford Appleton Laboratory); Dr ONKEN, Drew (Lawrence Berkeley National Laboratory); Dr BIZARRI, Gregory (Lawrence Berkeley National Laboratory); Dr BOURRET, Edith (Lawrence Berkeley National Laboratory)

**Presenter:** TREMSIN, Anton (University of California at Berkeley)

**Session Classification:** Applied Bragg edge imaging

**Track Classification:** Bragg Edge Imaging
