

Kick-off workshop for the search of a muon EDM using the frozen spin technique at PSI

Contribution ID: 17

Type: **not specified**

First result from beam tests at PSI

Monday, 17 February 2020 14:40 (20 minutes)

In 2019 we have measured the beam profiles of two potential muon beamlines at PSI. These measurements will permit the extraction of the transverse phase space for calculations of injection into a compact storage ring.
